

Sreehari T M

Bangalore, India

sreeharitm11@gmail.com — +91 73062 70021

ORCID: [0009-0006-3707-0928](https://orcid.org/0009-0006-3707-0928) — [Google Scholar](#)

Professional Summary

Assistant Professor and Ph.D. research scholar in Cloud Computing with experience spanning academia, research, and industry. My work focuses on machine learning applications, data engineering, cloud optimization, and cybersecurity, with published research in IEEE, Springer, and peer-reviewed journals. Experienced in teaching undergraduate engineering courses, mentoring students, coordinating academic initiatives, and building real-time AI-driven applications.

Academic Experience

Assistant Professor

Presidency University, Bangalore

Sep 2025 – Present

- Teaching undergraduate courses for B.E.CSE and B.E.CSE (Cyber Security) programs.
- Subjects taught: Malware Analysis, Intrusion Detection and Prevention Systems (IDPS), Generative AI, and Python Programming.
- Coordinator – Faculty Development Programs (FDPs) and Memoranda of Understanding (MoUs).
- Active involvement in curriculum development and departmental initiatives promoting academic-industry collaboration.

Teaching Associate

Ramaiah Institute of Technology, Bangalore

Dec 2024 – Aug 2025

- Delivering full-stack & web programming courses with hands-on labs and real-world case studies.
- Conducted hands-on workshop on GIT and version control tools.
 - Member – Consultancy/Industry Interaction
 - Member – Internship Committee
 - Member – Magazines (Sampige)
 - Member – Industry Advisory Board (IAB)
 - Coordinator – Website
 - Coordinator – Sports
 - Contributed to syllabus revision for: Cloud Computing, DevOps, Mobile Application Development, Blockchain, and Full Stack Development
 - Coordinator – Full Stack Development Workshop
 - Coordinator – Partial Delivery in Mobile Application Development

Industry Experience

Senior Enterprise Operations Executive

Intellipaat, Bangalore

Feb 2024 – Nov 2024

- Led corporate and individual training in Full Stack, Salesforce, and Cloud technologies.
- Delivered tailored content using Zoom, MS Teams, Webex, and GoToMeeting.

- Supported learners in SQL, Excel, and data-driven decision-making tools.

Site Reliability Engineer (S.R.E)
Aug 2022 – Dec 2023

NoBroker, Bangalore

- Focused on improving system reliability, scalability, and performance.
- Implemented automation and monitoring solutions to support production systems.
- Collaborated with development and operations teams to ensure seamless deployments and system uptime.

Education

Ph.D. in Cloud Computing (Registered)(under VTU)

Research Centre: BMS Institute of Technology and Management, Bangalore

Guide: Dr. Ganesh P

Focus: Data Engineering, Machine Learning, Cloud Optimization

MCA – Master of Computer Applications
 Ramaiah Institute of Technology, Bangalore

CGPA: 8.06

BCA – Bachelor of Computer Applications
 Paramekkavu Arts and Science College, Thrissur

Publications

Published

Accepted / In Proceedings

- **Sreehari T M**, Geetanjali R, and Gireesh Subrahmanya Hegde, “REPACK360: An Intelligent Multi-Tier Platform for Sustainable Packaging with Automated Environmental Impact Assessment,” accepted for presentation at the *International Conference on Technology and Management for Sustainable Development*, Sairam College of Engineering, Chennai.
- Geetanjali Rave and Sreehari T M, “Sustainable Optimization of Natural Fiber Composites for Aircraft Fuselage Using Machine Learning and MCDM,” *Journal of Natural Fibers*, Taylor & Francis, Q3 Journal (Accepted).

Patents

- Security Evaluation of IoT Networks: Hybrid Attack Analysis on LoRa Protocol
(Application Date:10/04/2025,Publication Date : 02/05/2025, Application No.202521035014 A,)
- Sustainable Machine-Learning-Based Demand Forecasting and Energy Optimization System
(Application Date: 29/01/2026, Publication Date: 13/02/2026, Application No. 202641009448 A)

Professional Membership

International Association of Engineers (IAENG)

Member Name: Sreehari T M

Membership Number: 544087

Member Since: 10 December 2025

- Member, IAENG Society of Artificial Intelligence
- Member, IAENG Society of Bioinformatics
- Member, IAENG Society of Computer Science
- Member, IAENG Society of Data Mining
- Member, IAENG Society of Internet Computing and Web Services
- Member, IAENG Society of Imaging Engineering
- Member, IAENG Society of Information System Engineering
- Member, IAENG Society of Scientific Computing
- Member, IAENG Society of Software Engineering
- Member, IAENG Society of Wireless Networks

Faculty Development Program

- Faculty Development Program on Artificial Intelligence and Machine Learning, Nextera Unitech (30 June 2025 – 7 July 2025)
- Faculty Coordinator and Participant, FDP on Research Writing, Publications, and Intellectual Property Awareness for Faculty, Presidency University, Bengaluru (10 – 12 December 2025)

Projects

- **REPACK360: Intelligent Sustainable Packaging Platform** – *MongoDB, Express.js, React, Node.js, REST APIs, Multi-Criteria Sustainability Scoring, Impact Analytics*
Developed a multi-tier platform for sustainable packaging selection with automated supplier negotiation, eco-scoring across seven environmental criteria, and real-time impact tracking for waste, carbon, water, and energy metrics. Designed the system to process high-volume simulated transactions through API-based services.
- **CKD Stage Prediction System** – *Python, Scikit-learn, Flask, Streamlit, SHAP, Random Forest, SVM, Gradient Boosting, Soft Voting Ensemble*
Built a real-time and explainable application for chronic kidney disease stage prediction using clinical and biochemical data. Implemented preprocessing, hybrid feature selection, soft-voting ensemble modeling, and SHAP-based interpretability with sub-0.5 second prediction latency.
- **Phishing Website Detection System** – *Python, Scikit-learn, XGBoost, Random Forest, SVM, KNN, Naïve Bayes, Lexical URL Feature Engineering*
Developed a real-time phishing detection tool that extracts and analyzes 31 lexical website features to classify malicious URLs. Evaluated multiple classifiers including Logistic Regression, KNN, Naive Bayes, SVM, Random Forest, and XGBoost, with Random Forest achieving 96.8% accuracy.

- **EMOTUNE** – *TensorFlow Lite, MobileNetV2, Raspberry Pi 4, OpenCV, PyGame, Edge Inference*
Designed a real-time emotion-aware music recommendation system using facial expression recognition and on-device inference. Trained a lightweight MobileNetV2-based model on a 12,000-image dataset and deployed the pipeline on Raspberry Pi for low-latency mood-adaptive playback.
- **Credit Card Fraud Detection with Enhanced Variational Autoencoder-Decoder** – *Python, Variational Autoencoder, Temporal-Aware SMOTE, Adaptive Denoising, Reconstruction-Error Modeling, Fraud Scoring*
Developed a deep learning approach for highly imbalanced fraud detection using an enhanced VAE-based architecture with temporal-aware oversampling, adaptive denoising, and a multi-task ensemble for reconstruction-error and metadata-based fraud classification.
- **Knee Injury Diagnosis and Outcome Prediction from MRI** – *PyTorch, MRNet, MRI Volume Processing, Custom DataLoaders, Feature Extraction, ROC-AUC Evaluation, OAI Data Fusion*
Developed a deep learning workflow for automated knee abnormality, ACL tear, and meniscus tear analysis from MRI volumes using MRNet-style modeling. Built data exploration, dataset loading, training, validation, and feature extraction pipelines over MRNet and OAI data for diagnosis and longitudinal outcome-oriented research.
- **Spotty: Smart Campus Navigation Platform** – *React, Vite, Tailwind CSS, Express.js, MongoDB, Mongoose, Socket.IO, Mappls SDK, Nodemailer OTP*
Developed a campus intelligence platform for Presidency University with live location pins, guard movement tracking, real-time chat, leaderboard-based engagement, and email OTP-based authentication. Built React/Vite frontend modules and Express/MongoDB backend APIs with Socket.IO-powered live updates.
- **CodeExam Pro: AI-Assisted Coding Exam System** – *React, TypeScript, Vite, Monaco Editor, Tailwind CSS, Ant Design, Express.js, MongoDB, Docker Sandbox*
Built a coding assessment platform with student and faculty dashboards, timed programming tests, Monaco-based code editor integration, AI-assisted result feedback, CSV export, and sandbox-oriented execution support using containerized compiler environments.
- **Women's Safety App** – *Android, Java, Firebase Authentication, Realtime Database, Google Maps API, Android Studio*
Developed an Android application that enables quick emergency alerts with real-time location sharing, contact notifications, and SOS sound alarms. Integrated Firebase for user authentication and real-time database, used Android Studio for development, and Google Maps API for geolocation services.
- **Cyberbullying Detection System** – *Python, NLP, Text Classification, Flask, Jupyter Notebook, HTML/CSS, Anaconda*
Implemented a text classification system to identify potential cyberbullying in online messages using supervised ML models. Built with Flask for the web interface and Jupyter Notebook-based workflows for NLP preprocessing and model training.

Technical Skills

Programming Languages: C, C++, Python, Java, JavaScript, TypeScript, PHP, Shell Scripting

Generative AI & Large Language Models: Large Language Models (LLMs), Prompt Engineering, Transformers, Tokenization, Text Generation, Text Classification, Embeddings, Retrieval-Augmented Generation (RAG), Fine-Tuning (Basics), Hugging Face Transformers, LangChain (Basics), Google AI Studio (Gemini Models), LLaMA (Academic Use), NVIDIA-hosted LLMs (DGX Cloud / NVIDIA AI Platform), OpenAI API (Academic Use)

Deep Learning Frameworks: PyTorch, TensorFlow, Keras

Computer Vision & AI Models: YOLO (v5/v8/v10/v12), Convolutional Neural Networks (CNNs), Image Classification, Object Detection, Roboflow (Dataset Annotation and Management)

Machine Learning: Supervised and Unsupervised Learning, Regression, Classification, XGBoost, K-Means, Recurrent Neural Networks (RNN), Natural Language Processing

AI Application Development: Streamlit, Gradio, Flask (ML-based Applications)

Cloud, MLOps & DevOps: AWS, Azure, GCP (Basics), Docker, Git, GitHub, CI/CD Pipelines, Kubernetes (Basics), Monitoring, Load Balancing, Firebase Hosting

Tools & Platforms: NVIDIA H200 GPUs (Hands-on Training), NVIDIA DGX (Academic Access), Jupyter Notebook, Anaconda, Google Colab, VS Code, Android Studio, Postman, Swagger, Heroku, Notion, Slack, Zoom, Webex, MS Teams

Certifications

- Certificate of Training Completion in Artificial Intelligence and Machine Learning (40 hours) – GI Ventures, NVIDIA Partner
- AWS Certified Cloud Practitioner – Foundational

Microsoft Learning Badges

- Microsoft Identity and Access Administrator
- Microsoft Security Operations Analyst
- Microsoft Cybersecurity Architect
- Microsoft Azure Security Technologies
- Microsoft Azure Administrator
